SW13	Bypass	DPDT		
Hi/Lo Input	Impedence	DPDT		

**Parts List**  
**DIY-81 rev 1**

**Everything Else**

**Description**    **Function**

Knobs	Various knobs for control pots and rotary switches
Caps	Various caps for the knobs and switches
Rack Case	Gotta put this thing inside some sort of box
XLR	Audio inputs and output. Use separate Mic and Line connectors. ALL BALANCED.
Rear Connector	You can either solder direct to and from the mainboard or use a multi terminal connector or barrier strip.
PCB	The mainboard is large ... about 10" x 6" ... so I would suggest buying one 12" x 12" board and cut it to size. From this you will also be able to make the amp boards. It's a bit tight but if you take your time it should work out.
PCB	This smaller PCB is for the power supply. 6" x 3" will be enough.
LED	The usual assortment of lights to fancy up your unit.
IEC Inlet	The usual 3 prong power inlet to supply mains voltage.
Fuse	Fuse the mains input for protection.

**The Power Supply**
